operations. As a result of this non-controllable gas entering El Paso's system, the gas takes from other prorated, non-prorated and non-marginal gas wells must be incrementally reduced.

Please be advised that the South Empire State Com No. 1 Well may, or may not, be shut-in once it has been placed back to normal scheduling. El Paso's market demand will dictate such course of action.

If you have any questions concerning this matter, please contact.

Very truly yours,

E. R. Manning
