RE: Reconnection to pipeline  
Callaway Fed. #2  
Diamond Mound Atoka-Morrow Pool  
Sec. 6-T16S-R28E

Dear Sir,

Our records show a disconnect notice sent to your office by the previous operator, Chevron USA. This letter is to follow up the C-104 form sent notifying the NMOCD of the recent change of ownership to Matador Petroleum Corp and to notify your office of placing the above captioned lease back into production. This well was reconnected to El Paso Natural Gas Pipeline Co. on February 2, 1990 at 3:00 PM at a stabilized rate of production of 1022 mcf/d + 4 bbls condensate. Please update your files to show this reconnection placing this well back on line.

Sincerely,

H. E. Gene Lee  
Agent

Matador Petroleum Corp.
