12. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 1103. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

TA9 Read & Stevens proposes to plug and abandon the subject well by placing a CIBP at 3,500' above existing Penrose perforations of 3,600'-3,622', and capping the CIBP w/ 35' of cmt. The 4 1/2" csg will then be cut and pulled from the approximate top of cmt of 2,000'. A 100' cmt plug will be placed 50' in and 50' out of the stub and tagged. A 150' cmt plug will be placed across the top of the salt and 75' out and 75' in the base of the 8 5/8" surface csg set at 1,252'. A 100' cmt plug will be set at 400' to protect fresh water, and after the wellhead is cut off a 60' surface plug will be installed with a dry hole marker erected.

Notify OGD 24 hrs. prior to any work done
