Eddy County, NM

Dear Mr. Clements:

In receipt of your February 9, 1983 letter concerning the captioned well, I have discussed it with our geology and engineering departments. Our office is currently evaluating the Atoka and Wolfcamp reservoirs and has undertaken an engineering study in order to determine whether in our opinion the two formations should be commingled, dually completed, or one zone should be abandoned.

We will keep you informed as to which of the above completion methods we choose and any applications for commingling or dual completion we make.

Sincerely,

GRYNBERG PETROLEUM COMPANY

Nancy Stolzle
Assistant Land Manager
