1. The first group of authors (e.g., [1, 2]) has shown that the use of a single factor model is not sufficient to explain the observed data. They have shown that the use of a single factor model leads to a poor fit of the data, and that the use of a single factor model leads to a poor fit of the data.

the 1990s, the number of people in the United States who are 65 years of age or older is projected to increase from 20 million to 30 million, and the number of people 75 years of age or older is projected to increase from 10 million to 15 million (U.S. Census Bureau, 1996).
