

Memo

10-24 85

From

RAY SMITH
Field Representative

To James Beck,
Here is the information you requested on
the Diamondback Petroleum wells.

Pipe was run on the Martha #1 well
on February 5, 1983.

They began drilling the Margie - Kay #1
on April 8, 1983.

James, we would rather not be giving
you plugging prices but you might
want to consider having a contractor
give you a price less the salvage of
the equipment. This is what I do. We
are not in the salvage business & I
do not want to mess with it.

If we can assist you please call.

Ray Smith

Oil Conservation Division
