

9. WELL SITE LAYOUT:

- A. Exhibit "D" shows the relative location and dimensions of the well pad, reserve pits, and major rig components. The pad and pit area has been staked and flagged, 400' X 400'.
- B. Mat Size: 225' X 155', plus 100' X 75' reserve pits and a 20' X 20' stinger. The pits will be oriented to the north.
- C. Cut & Fill: A two foot cut on the west with fill to the east will be required.
- D. The surface will be topped with compacted caliche and the reserve pits will be plastic lined.

10. PLANS FOR RESTORATION OF THE SURFACE:

- A. After completion of drilling and/or completion operations, all equipment and other material not needed for operations will be removed. Pits will be filled and the location cleaned of all trash and junk to leave the well site in an aesthetically pleasing a condition as possible.
- B. Any unguarded pits containing fluids will be fenced and screened until they are filled.
- C. If the proposed well is non-productive, all rehabilitation and/or vegetation requirements of Bureau of Land Management will be complied with and will be accomplished as expeditiously as possible. All pits will be filled and leveled within 90 days after abandonment or when dry enough to work.

11. OTHER INFORMATION:

- A. Topography: The proposed well site and access road is located on a flat plateau with a 2% easterly slope, which is part of the upland plains east of the Pecos River. The location elevation is 3597'.
- B. Soil: The topsoil at the well site is a light calcareous loam with considerable caliche and gypsum scatter and underlain with fractured limestone that also outcrops the surface. The soils are of the Reeves-Reagan loam series.
- C. Flora and Fauna: The vegetation cover is a fair to sparse grass cover of dropseed, grama, fluffgrass, and three-awn, along with plants of yucca, snake broomweed, Javelina Bush, sage, creosote bush, cacti and miscellaneous weeds and wildflowers. The wildlife consists of rabbits, coyotes, rattlesnakes, lizards, dove, quail and other wildlife typical of the semi-arid desert land.
- D. Ponds and Streams: None in the immediate vicinity. The Pecos River is approximately 3.5 miles to the west.
- E. Residences and Other Structures: Nothing but oil/gas facilities to the south.
- F. Land Use: Cattle grazing.
