13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

OXY USA Inc. is requesting a variance to the BLM reserve pit stipulations in the general area of the Crow Flats Morrow and Logan Draw Morrow pools in Eddy County, NM. When constructing the reserve pits and material such as gyp rock and/or caliche is encountered at a depth that would not allow a sufficient depth for a 100% cut without blasting. The cut leaves an adequate amount of surface material to reclaim the pit per the stipulations. Upon final reclamation, caliche will be used from the pad area to help cover the pits.
