

SURFACE USE AND OPERATIONS PLAN SDX RESOURCES, INC.
Trigg Federal # 4
330' FSL, 2210' FEL
Unit O, Sec. 26, T17S, R27E
Eddy Co., NM

1. Existing Roads:

- A. The well site and elevation plat for the proposed well is shown in Exhibit #2. It was staked by Dan Reddy, Carlsbad, New Mexico.
- B. All roads to the location are shown in Exhibit #3A. The existing roads are labeled and are adequate for travel during drilling production operations. Upgrading of the road prior to drilling will be done where necessary as determined during the onsite inspection.
- C. Directions to location: E. of Artesia on Hwy. 82 ~ 8 miles . Turn right on CR 204. Go .2 M and turn right on CR 225. Go ~ 1.5 M and turn right to location.
- D. Routine grading and maintenance of existing roads will be conducted as necessary to maintain their condition as long as any operations continue on this lease.

2. Proposed Access Road:

Exhibit #3A shows the existing roads .

No new access road is necessary..

3. Location of Existing Wells:

Exhibit #4 shows all existing wells within a one-mile radius of this well.

4. Location of Existing and/or Proposed Facilities and ROW's:

- A. If the well is productive:
 - 1. The well will be tested and a 2" or 3" poly flowline will be laid from this well to the Trigg Fed. #2 location and then beside the access road to the battery located at the Trigg Fed. #1 well.
 - 2. A Power line will be built to location by CVE. No ROW should be necessary.
- B. If the well is productive, rehabilitation plans are as follows:
 - 1. The reserve pit will be back-filled after the contents of the pit are dry (within 120 days after the well is completed).
 - 2. Topsoil removed from the drill site will be used to recontour the pit area to the original natural level, as nearly as possible, and reseeded as per BLM specifications.
