

EAGLE 34 FEDERAL 36  
SURFACE USE AND OPERATING PLAN  
PAGE 2

3. Location of Existing Wells:

Exhibit #4 shows all existing wells within a one-mile radius of the proposed Eagle 34 Federal #36 .

4. Location of Existing and/or Proposed Facilities:

- A. In the event the well is found productive, the necessary production equipment will be installed at the well site.
- B. If the well is productive, rehabilitation plans are as follows:
  - a. The reserve pit will be back-filled after the contents of the pit are dry (within 120 days after completion, weather permitting).
  - b. Caliche from unused portions of the drill pad will be removed. The original topsoil from the well site will be returned to the location. The drill site will then be contoured to the original natural state.

5. Location and Type of Water Supply:

The Eagle 34 Federal #36 will be drilled using a fresh water mud system (outlined in Drilling Program). The water will be trucked or pumped to the location. No water well will be drilled on the location.

6. Source of Construction Materials:

All caliche utilized for the drilling pad and proposed access road will be obtained from a existing BLM approved pit. All roads will be constructed of 6" rolled and compacted caliche.
