FEB 26 1962

The elevation of the ~~ground~~<sup>Ground</sup> level above sea level is 3685 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill a well at the above location to a depth of approximately 2900 feet to test the Lovington sand of the San Andres section.

We will run approximately 550 feet of 8 5/8" surface casing and cement same with 50 sacks. We expect to run approximately 2125 feet of 7" as a water string pulling same when the oil string is cemented. We will run an oil string of 5 1/2" or 4 1/2" cementing with 100 or 125 sacks \*perforate the sections as determined by the electric log and complete well.

\* Sufficient to cover Red Sand  
I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
