A. L. Porter  
Oil Conservation Commission  
Santa Fe, New Mexico

Dear Pete,

This will inform you of the circumstances in which the inclosed forms came to our office. They didn't inform us of anything until they brought the forms to us.

The first treatment bursted the 5½" pipe and the sand went behind the pipe. The second treatment they set packer on 2" tubing, but the boys on the rig told me they hadn't recovered load oil yet. The cut collar on 5½" about 1800' but couldn't pull on account of sand behind the pipe. Were running Bailer when I was there yesterday, getting nothing but sand.

Yours truly,

OIL CONSERVATION COMMISSION
