(Range)

(Meridian)

Undesignated  
(Field)

Eddy  
(County or Subdivision)

New Mexico  
(State or Territory)

The elevation of the derrick floor above sea level is 3596 ft.

### DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

We propose to drill this well with cable tools and set 8 5/8" surface casing at approximately 350' and cement to surface. We propose to drill to 3,000' and set 5 1/2" casing with sufficient cement to bring top of cement to 1,700'. We propose to Electric Log well and perforate the Motex and San Andres sections, if productive. We propose to acidize and sand frac oil frac during completion.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
