DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose that this well be shown as temporarily abandoned. The rods and tubing have been removed from the well and the top of the 7" casing capped to prevent the intrusion of any foreign matter into the well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
