DETAILS OF WORK

(State names of and reported depths to objective sands, show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work.)

First plug was placed at 2300' feet with 10 sacks of cement, pipe was first cut at 1400' but was unable to pull it until it was cut at 1200' recovered 1197' of pipe which left about 1200' of pipe in the hole. Hole was filled with mud to 100' feet where cement plug was set using 12 sacks of cement filled hole with mud to surface cut 4" another with 6" being about 9" above surface. Another was cemented with three sacks of cement. Work was started April 20, 1949 and finished April 29, 1949. Location is ready for your inspection. Regret I overlooked filing this report promptly at the time the work was finished.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
