(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Square Lake Grayburg **Eddy** **New Mexico**

(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is **3644** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Purchased well from O. H. Randel in August of 1962. Mr. Randel has temporarily abandoned the well in March of 1960 at a total depth of 2582 feet. We will reenter the hole and clean out to 2582, run Gamma-Sonic logs to 2582. Run 2582 of 4 1/2", 10 1/2 lbs., J-55 casing, cemented with approx. 175 sks. of regular neat cement (this will cover the red sand). After letting cement cure for 72 hours we will attempt to complete by fracing.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
