(Range)

(Meridian)

Undesignated
(Field)

Edgy
(County or Subdivision)

New Mexico
(State or Territory)

The elevation of the ~~drill~~ ^{ground} floor above sea level is 3572 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well to test the Atoka formation, at an estimated T.D. of 11,700'. It is proposed to (1) Set 13 1/8" casing at 820' with sufficient cement to circulate, (2) Set 9 5/8" casing at 3500' with sufficient cement to circulate, (3) Set 7" casing at total depth, amount of cement to be determined by depth of uppermost prospective pay zone. We propose to WOC 24 hrs. on surface casing and test to 800' for 30 min., WOC 48 hrs. on 9 5/8" and test to 1000' for 30 min.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
