Detailed account of work done, nature and quantity of materials used and results obtained.

On 7-24-58 we ran 508 feet of 5 1/8" casing in this well and cemented with 100 sacks of cement. After waiting 72 hours for the cement to set we drilled the plug and tests showed complete water shut off. We had Dowell, Inc. sandfrac treat the well in the open hole (908-25) with 14,000 gallons of Petrojet Service and 14,000 lbs. of sand. Production was increased from 14 gallons of oil per hour to 50 BOPD.
