April 25, 1961

2-22 Federal 19

Well No. 2 is located 2310 ft. from [N] line and 2970 ft. from [E] line of sec. 19

TW/4 19 (1/4 Sec. and Sec. No.) T 17 S (Twp.) R 29 E (Range) NMP (Meridian)

Ald (Field) Eddy (County or Subdivision) New Mexico (State or Territory)

The elevation of the derrick floor above sea level is 3691 ft.

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well with a cable tool rig to test the Seven Rivers Formation at approximately 950'. We plan to set 8-5/8" 32# casing at 400', with no cement if no water is present, for gravel control. Should water be encountered the 8-5/8" casing will be cemented with 50 sacks. We will then drill a 7" hole to total depth, and should conditions warrant setting oil string, 4 1/2" casing will be set and cement circulated to surface. (4 1/2"-9 1/2") Completion plans will depend upon geological findings.

## INSTRUCTIONS FOR COMPLETION OF FORM C-123

1. Operator shall furnish and certify to the information called for in Section A.
2. Operator shall outline the dedicated acreage for *both* oil and gas wells on the plat in Section B.
3. A registered professional engineer or land surveyor registered in the State of New Mexico or approved by the Commission shall show on the plat the location of the well and certify this information in the space provided.
4. All distances shown on the plat must be from the outer boundaries of the Section.
5. If additional space is needed for listing owners and their respective interests as required in question 3 of Section A, please use space below.
