Grayburg-Jackson Oddy New Mexico
 (Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3543 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The above well has produced no oil since April 1930. Previous to that date an attempt was made to clean out and increase production with no success. We plan on abandoning this well. The well will be plugged according to regulations of the U.S.G.S., pipe will be pulled by Lea County Casing Pullers and notice will be given you, after we have received your approval, before work starts.
