Re: Pool Designation,
Leonard State Com, Well
No. 1-E, 22-17-29, Eddy
County, New Mexico

Gentlemen:

The subject well was completed late in 1957 as a gas well producing from a lower Pennsylvanian pay. Subsequently the pool discovered by this well was designated the Grayburg-Atoka Gas Pool.

Recently, in examining logs of this well and the Mana Resources well in the SE/4 of Section 21-17-29, it was discovered that the producing interval appears to be that currently recognized as the Morrow zone rather than the Atoka zone as designated.

If, in fact, the Morrow zone is the producing horizon, a change in pool nomenclature needs to be made by this office. This change would be from Grayburg-Atoka Gas Pool to Grayburg-Morrow Gas Pool.

As this pool falls under the old 160 acre gas spacing rules, it is somewhat important to have the correct formation designation in the pool name.

Please advise this office if you concur with the proposed change or if you have any questions about the same.

Very truly yours,

OIL CONSERVATION COMMISSION
