Los Rillos, New Mexico June 5, 1957Well No. 8 is located 1900 ft. from [N] line and 640 ft. from [E] line of sec. 23Sec. 23 (Sec. and Sec. No.) 17-3 (Twp.) 25-N (Range) S. 10. E. 7. N. (Meridian)Granger, New Mexico (Field) 1447 (County or Subdivision) New Mexico (State or Territory)The elevation of the derrick floor above sea level is 3572 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On May 24, 1957 we ran 778' of 5 1/2" OD 17# new JS casing as liner hung on Brown Type "C" 6-slip liner hanger and Type "T" packer (16") Total length 774' hung from 2516' to 3290' and cemented with 35 sacks cement.

After allowing to stand cemented for 17 hours we ran temperature survey which indicated top of cement at 2835'.

After standing cemented for 72 hours we drilled plug, bailed hole dry and re-ran bailer. As shut-off proved complete drilling was resumed.

Cementing was done by Denton Oil Well Cementing Co.

Temperature survey was run by Dent Engineering Co.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
