Loco Hills, New Mexico April 15, 1957Well No. 2 is located 2310 ft. from N line and 2310 ft. from W line of sec. 23SE 1/4 Sec. 23 17-S 29-E N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)Grayburg-Isely Eddy New Mexico
(Field) (County or Subdivision) (State or Territory)The elevation of the derrick floor above sea level is 3596 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On April 6, 1957 we ran 677' of 5 1/2" OD 15.5# 2nd thrd new JS casing as liner hung on Brown Type "C" 6-slip liner hanger and Type "P" Packer (16"). Total length 693' hung from 2553' to 3246' and cemented with 35 sacks cement. After standing cemented for 16 hours ran temperature survey which indicated top of cement at 2783'.

After allowing to stand cemented for 72 hours we drilled plug bailed hole dry and re-ran bailer. As shut-off proved complete drilling was resumed.

Cementing was done by Denton Oil Well Cementing Company.

Temperature survey was run by West Engineering Co.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
