Grayburg Deep Well

Well No. 5 is located 330 ft. from [N] line and 640 ft. from [E] line of sec. 25Section 25
(1/4 Sec. and Sec. No.)17-S
(Twp.)22-E
(Range)N.M.P.M.
(Meridian)Wilcox
(Field)Doña
(County or Subdivision)New Mexico
(State or Territory)The elevation of the derrick floor above sea level is 3610 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On July 13, 1960 we ran 6043' of 5 1/2" OD Std 1300 mixed new and used MS & JS casing to 6025' with Millerburner IV Tool & 3900'.

We cemented with 375 sacks of 50-60 Fomina and mud cement with 25 gal gravel shoe and 275 sacks 50-60 Fomina and mud cement with 125 gal through IV Tool.

After allowing to stand cemented for 48 hours we pressured upon casing to 1000 psig. We then drilled out IV Tool and cement to 6025'. We again pressured up to 1000 psig. Pressure test proved O.K.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
