(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

We request this shut-in water injection well be held for possible use as an injection well in a Metex Sand flood under study at this time.

Well was shut in November, 1970 for economical or mechanical reasons.

After feasibility studies are completed work should be commenced within the next two years.

18. I hereby certify that the foregoing is true and correct

This is a high-contrast, black and white aerial photograph of a coastal region. A prominent road or railway line runs diagonally from the lower left towards the center. To the right of this line, there are several small, dark, rectangular structures, possibly buildings or industrial sites. The surrounding area is mostly white, indicating a flat, open landscape or water. The image is grainy and has a high level of contrast, typical of older aerial photography.
