DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On April 4, 1951, we ran 3046' of 7" OD Std third 20# R-40 new National seamless casing to 3046' and cemented with 100 sacks cement preceded by heavy mud to surface.

After allowing to stand cemented for 72 hours we drilled plug, bailed hole down and tested shut-off by the bailing method.

As shut-off proved complete drilling was resumed.

Cementing was done by Denton Oil Well Cementing Company.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
