Los Alamos, New Mexico, June 11, 1951

Well No. 39-C is located 25 ft. from N line and 1295 ft. from E line of sec. 25

NE 1/4 Section 25 17-S 29-W 10TH
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Grayburg-Jackson Early New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3536 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On May 26, 1951, we ran 392' of 8-1/8" OD 24# Std third used Lapweld casing to 399' and cemented with 90 sacks cement preceded by heavy mud to surface.

After allowing to stand cemented for 72 hours we drilled plug, bailed hole down and tested water shut-off by the bailing method.

As shut-off proved complete drilling was resumed.

Cementing was done by Denson Oil Well Cementing Company.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company General American Oil Company of Texas

Address Box 416, Los Alamos, New Mexico
