(State or Territory)

The elevation of the derrick floor above sea level is **3563** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On March 14, 1957 we ran **424'** of **5 1/2" OD 15.50** dth. third, new **JS** casing hung on Brown Type C 6-ship liner hanger and Type F Packer (**16"**). Total length **424'**, hung from **242'** to **302'**. Cemented with **35** sac cement.

After allowing to stand cemented for 14 hours, ran temperature survey which indicated top of cement at **244'**. After standing 72 hours we drilled plug, bailed hole dry and re-ran bailer. As shut-off proved complete drilling was resumed.

Cementing was done by Denton Oil Well Cementing Co.

Temperature survey run by West Engineering Co.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
