(Field) (County or Subdivision) (State or Territory)The elevation of the derrick floor above sea level is 3563 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

RECORD OF ACID & FRACTURING:

- 3-23 Washed hole with 55 gals. HCl.
- 3-24 Bailed 15 GPH (rate of 8.57 BOPD).
- 3-25 Ran 2587' of 4 1/2" OD EUE tubing with 59' of 3 1/2" EUE & Guiberson LV 3 1/2" x 5 1/2" Packer on bottom at 2652'.
- 3-26 Fractured as follows: Loaded tubing with 9 Bbls. 20% HCl & 43 Bbl. Loaded annulus with 55 Bbl. Broke formation down with 27 Bbl, then used 881 Bbl containing 5,000# 40-60 & 45,000# 20-40 Ottawa Sand. Flushed with 88 Bbl. Max Inj. Press. 3200 psig; Minimum 2800; shut down 1800. Total Inj. time 41 1/2 minutes. Avg. Inj. Rate 24.4 B.P.M. Total load oil to recover 1094 bbls. Used 3 Allisams & 1 blender by Dowell, Inc.

RESULTS OF FRACTURING:

3-27 restarted Opened well at 6:20 AM with 50 psig on tubing & 540 psig on casing.

THEORY OF THE EARTH

CHAPTER I

OF THE ORIGIN AND DEVELOPMENT OF THE EARTH

SECTION I

OF THE ORIGIN OF THE EARTH

The origin of the earth is a subject which has attracted the attention of philosophers and scientists from the earliest times. The ancient Greeks, the Romans, and the Arabs all had their own theories of the origin of the world. The modern philosophers and scientists have also been occupied with this question, and have proposed various hypotheses to explain the origin of the earth. The most common of these hypotheses is the nebular hypothesis, which supposes that the earth was formed out of a nebula of gas and dust. Other hypotheses have been proposed, but none have gained as much acceptance as the nebular hypothesis.

SECTION II

OF THE DEVELOPMENT OF THE EARTH

The development of the earth is a subject which has also attracted the attention of philosophers and scientists.

The ancient Greeks, the Romans, and the Arabs all had their own theories of the development of the world.

The modern philosophers and scientists have also been occupied with this question, and have proposed various hypotheses to explain the development of the earth.

SECTION III

The development of the earth is a subject which has also attracted the attention of philosophers and scientists.

The ancient Greeks, the Romans, and the Arabs all had their own theories of the development of the world. The modern philosophers and scientists have also been occupied with this question, and have proposed various hypotheses to explain the development of the earth. The most common of these hypotheses is the nebular hypothesis, which supposes that the earth was formed out of a nebula of gas and dust. Other hypotheses have been proposed, but none have gained as much acceptance as the nebular hypothesis.

The development of the earth is a subject which has also attracted the attention of philosophers and scientists.
