Loco Hills, New Mexico July 18, 19 56

Well No. 6 is located 660 ft. from N line and 1980 ft. from E line of sec. 26

NE 1/4 NW 1/4 Sec. 26 17-S 29-E N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Grayburg-Keely Eddy New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3578 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On July 12, 1956, we ran 3289' of 5 1/2" OD 14 # 8rd mixed H-40, J-55 electricweld and seam seamless new casing to 3291' and cemented with 35 sac Alamo cement. After allowing to stand cemented for 8 hours, ran temperature survey which showed top of cement at 2620'. After allowing to stand cemented for 72 hours, bailed hole dry, drilled plug, and re-ran bailer. As shut-off proved complete drilling was resumed. Cementing was done by Denton Oil Well Cementing Company. Temperature survey was run by West Engineering Company.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company General American Oil Company of Texas

Address P. O. Box 416

Loco Hills, N. M.
