Re: Robinson Jackson Unit  
Tr.2A #8-K, 27-17-29  
Eddy County, NM

Dear Mr. Downey:

This is to confirm our telephone conversation of January 19, 1979, requesting that the subject water injection well be shut-in and it remain shut-in until such time as the well located 150' west of it has been re-entered and re-plugged.

Said well being the old Sinclair Oil & Gas Company, F. M. Robinson B(ARC) #32-K, 27-17-29.

According to our records this well was drilled to a total depth of 6390' and has 7 5/8" casing at 1008 w/700 sacks and plugged as follows:

- 81 sacks cement 6000-6390
- 42 sacks cement 3200-3400
- 62 sacks cement 2600-2900
- 15 sacks cement 985-1018
- 15 sacks cement at surface w/marker.

Sincerely yours,

W. A. Gressett  
Supervisor, District II
