Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED WORK (Include all relevant details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface location and measured and true vertical depths for all markers and zones pertinent to this work.)

This well is currently a shut-in gas well with no market for the small amount of gas. We request it be held pending further study of shallow gas prospects in the area.

Well was shut in September, 1973 for economical or mechanical reasons.

After feasibility studies are completed work should be commenced within the next two years.
