DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill and complete our Leonard Federal No. 9 well with cable tool rig as follows:

Drill 15" hole and set 8 5/8" OD 24.00 lb. surface casing at approximately 150' with 50 sacks cement with 2% gel and 2% CaCl.

Drill 8" hole to 2600' to test the Premier section of the Grayburg and the San Andres formation.

Complete in the San Andres or Grayburg formation by setting 4 1/2" OD 11.00 lb. casing and perforating, and treating.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
