Artesia, New Mexico

Dear Sir:

Regarding C-115 Reports on Cowell State Lease, Unit-L, Section 32,
Township 17S, Range 29E.

When we mentioned losing some oil from a leak in tank, actually we have been using the wrong tank table to compute storage. A 500 barrell tank table was used and should have used a 250 barrell tank table. We noticed this discrepancy when we lost about 30 barrells from a leak. The storage is correct as reported on March 1966 report. The discrepancy amounts to 192 barrells. The runs have been correct but more storage has been reported than there is in tank.

Yours truly,

R. D. Collier

R. D. Collier.
