SUNDRY NOTICES AND REPORTS ON WELLS

NOTICE OF INTENTION TO DRILL.....	<input checked="" type="checkbox"/>	SUBSEQUENT REPORT OF WATER SHUT-OFF.....	
NOTICE OF INTENTION TO CHANGE PLANS.....		SUBSEQUENT REPORT OF SHOOTING OR ACIDIZING.....	
NOTICE OF INTENTION TO TEST WATER SHUT-OFF.....		SUBSEQUENT REPORT OF ALTERING CASING.....	
NOTICE OF INTENTION TO RE-DRILL OR REPAIR WELL.....		SUBSEQUENT REPORT OF REDRILLING OR REPAIR.....	
NOTICE OF INTENTION TO SHOOT OR ACIDIZE.....		SUBSEQUENT REPORT OF ABANDONMENT.....	
NOTICE OF INTENTION TO PULL OR ALTER CASING.....		SUPPLEMENTARY WELL HISTORY.....	
NOTICE OF INTENTION TO ABANDON WELL.....			

(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

....., 1944
Feb. 24

Well No. 1 is located 999 ft. from N line and 999 ft. from E line of sec. 33

33 (1/4 Sec. and Sec. No.) 170 (Township) 170 (Range) N (Meridian)
Los Hills (Field) El Paso (County or Subdivision) N. Mexico (State or Territory)

The elevation of the derrick floor above sea level is ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We expect to drill a well at the above location to a depth of approximately 2900', unless oil or gas in commercial quantities is encountered at a lesser depth. We propose to run 24 3/4" casing on the top of the salt or immediately above the top of the salt at a point about 400' and cement with 50 sacks of cement and circulate mud to the surface. If oil is encountered in sufficient quantities, we expect to set from 2250' to 2300' of 20 7/8" O.S. casing as an oil string and also cement with 100 sacks of cement and circulate mud to the surface.

We expect, also to abide by U. S. G. S. rules and regulations.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
