This well was temporarily abandoned March 14, 1968 at TD 2780' after failure to obtain water shut off in the Loco Hills sand. The Loco Hills sand was squeezed with 600 sacks cement but after drilling out, the well flowed water. This work was done with cable tools and reverse circulating equipment.

On or about September 9, 1968 we plan to re-enter this well using rotary equipment and deepen from 2780' to 3500' to test the Premier and San Andres.

IN ABOVE SPACE DESCRIBE PROPOSED PROGRAM: IF PROPOSAL IS TO DEEPEN OR PLUG BACK, GIVE DATA ON PRESENT PRODUCTIVE ZONE AND PROPOSED NEW PRODUC-TIVE ZONE. GIVE BLOWOUT PREVENTER PROGRAM, IF ANY.

(This space for State Use)
