7. Describe Proposed or Completed Operation (CL - L	OTHER			
	7 Describe Bropaged to Co			

work) SEE RULE 1103.

Upon re-entering this well a 6 1/4" hole was drilled from 2780' to 3146'. Continuous shows of oil and gas, including free oil in the pits, were encountered throughout the Premier. We therefore decided to try for completion in the Premier rather than drilling to 3500' to test the San Andres as originally intended. 4 1/2" casing (9.5# J=55) was set at 3143' with 150 sacks cement. Plug down at 12:30 p.m. September 18. On September 21 pressured up on casing to 600 psi and held for 30 minutes, pressure held. Cementing work was done by Halliburton.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.

SIGNED Jum P. Stephens	TITLE Executive Vice-President	DATE 9-25-68
APPROVED BY A Busset	TITLE OIL AND GAS INSPECTOR	SEP 2 11000
