Attempted to re-enter old hole and complete as producer. In drilling below 9-5/8" surface casing, we were unable to re-enter old hole. Caliper and directional surveys were run at a depth of 1450' in an effort to determine means of drilling into the old hole. No feasible solution to this problem was determined. Drilling was abandoned at T.D. of 1611'. The surface pipe was cased with an 8-5/8" x 2" swage with a 2" valve in top of swage. Work on this well has been temporarily abandoned.
