(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

A small flow of salt water has reached the surface from between the original 7" oil string and the 8 1/4" surface pipe. A complete string of 4 1/2" casing was run and cemented to surface in 1979. We propose to eliminate this leak by perforating the 4 1/2" and 7" at ±1000' and cementing to surface. If pressure is too high, we will two-stage squeeze cement the leak. Sketch of well attached.

18. I hereby certify that the foregoing is true and correct
