(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

We request approval to dig a small emergency containment pit directly adjacent to the well to hold the backflowed water from the well while repairs are being made to the well. We have a small pencil size leak resulting from a hole in the tubing or packer leak. The pit will be emptied and backfilled upon the completion of repairs.

14. I hereby certify that the foregoing is true and correct

Emergency Pits

Conditions of Approval

Approval of the construction and use of the emergency pit described in your attached application is subject to the following conditions of approval:

1. Pit must be fenced to prevent access by livestock and wildlife.
2. Relocation or enlargement of pit must have prior approval.
3. Pit shall be emptied and liquids disposed of in a manner consistent with NTL-2B requirements within 48 hours following its use.
4. This agency reserves the right to modify or rescind approval whenever it determines continued use of the approved method may adversely affect the surface or subsurface environments.
