Well No. **19B** is located **660** ft. from **SW** line and **660** ft. from **E** line of sec. **1**
SE/4 SE/4 Section 1 **17S 30E** **T1N**
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Square Lakes **Eddy** **New Mexico**
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We desire approval to drill Jackson 19-B to 3250 feet to test the Lovington Sand. Plan to run 8-5/8" and cement at top of salt, and to run approximate 3,200 feet of 5" through the Lovington Sand; perforate and free separately the Lovington and Square Lakes Sands. Both casing strings will be cemented and tested for water shut off.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
