Well No. **20-3** is located **660** ft. from **[S]** line and **1900** ft. from **[E]** line of sec. **1**
34 1/4 32 1/4 **17S** **30E** **18N**
 (1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Square Lake **Hddy** **New Mexico**
 (Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We desire approval to drill Jackson 20-3 to approximately 3000 feet to test the Square Lake and Lovington Sands. We propose to drill through both of them; once below the Lovington Sand; perforate the Lovington Sand and frack. If the Lovington Sand is not found, we will perforate and frack the Square Lake Sand. 8-5/8" will be run to the top of the salt. 7" will be run to the Red Sand or approximately 2000 feet and then pulled. 5" will be set to total depth and cemented with 100 sacks.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
