Date

OIL CONSERVATION COMMISSION,
Santa Fe, New Mexico.

Gentlemen:

Following is a notice of intention to do certain work as described below at the

H. W. Snowden Neve State Well No. 1 in NE 1/4
Company or Operator Lease
of Sec. 2, T. 17S, R. 30E, N. M. P. M., Square Lake Field,
Eddy County.

FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

This well, while making a little oil, has been operating on a non-paying basis for the past year, therefore it is our intention to plug and abandon it. There is 475' of 8 1/2" casing set with 50 sacks of cement and 2328' of 7" casing set with 50 sacks of cement in this well. We will pull as much of this pipe as it is possible to recover and plug by the following method:

Fill with heavy mud from total depth of 2988' to base of oil string, set cement plug at this point, fill with heavy mud to point where pipe is shot, set cement plug. Fill with heavy mud to base of surface string, set cement plug. If any of the surface string can be recovered, a cement plug will be set at point pipe is shot or parted and the hole will be filled with mud to surface where cement plug and regulation marker will be placed. Work to begin immediately.

Approved _____, 19____
except as follows:

H. W. SNOWDEN

Company or Operator

1. Introduction

2. Purpose and Scope

The purpose of this document is to provide a comprehensive overview of the project's objectives, scope, and deliverables. It is intended for use by all project stakeholders, including the project manager, team members, and sponsors.

3. Project Objectives

The project objectives are to develop a new software application that will improve the efficiency of the current system and reduce the risk of data loss.

4. Project Scope

The project scope includes the development of the software application, testing, and deployment.

5. Project Deliverables

The project deliverables include the software application, test results, and deployment plan.

6. Project Risks

The project risks include the potential for delays, budget overruns, and scope creep.

7. Project Conclusion

The project is expected to be completed by the end of the year.

8. Appendix A: Project Charter

9. Appendix B: Project Plan

10. Appendix C: Project Budget

11. Appendix D: Project Risk Register

12. Appendix E: Project Communication Plan

13. Appendix F: Project Stakeholder Register

14. Appendix G: Project Change Log

APPENDIX A: PROJECT CHARTER

1. Project Purpose and Business Case

The project is intended to improve the efficiency of the current system and reduce the risk of data loss. The business case for this project is that it will result in a more efficient system that will save the company money and reduce the risk of data loss.

The project is expected to be completed by the end of the year. The project manager is responsible for the overall management of the project, including the development of the project plan, the management of the project budget, and the communication of project status to the project stakeholders.

The project is expected to be completed by the end of the year. The project manager is responsible for the overall management of the project, including the development of the project plan, the management of the project budget, and the communication of project status to the project stakeholders.
