Place

Date

OIL CONSERVATION COMMISSION,
Santa Fe, New Mexico.

Gentlemen:

Following is a notice of intention to do certain work as described below at the

H. W. Snowden **Hover State** Well No. **2** in **NEW MEX.**
Company or Operator Lease
of Sec. **2**, T. **17S**, R. **30E**, N. M. P. M., **Square Lake** Field,
Eddy County.

FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

This well has been producing on a non-paying basis for the past year, therefore it is our intention to plug and abandon it. There is 585' of 8 1/2" casing set with 50 sacks of cement and 2860' of 5 1/2" casing set with 100 sacks of cement in this well. We will pull as much of this pipe as it is possible to recover and plug by the following method:

Fill with heavy mud from total depth of 3061' to base of oil string, set cement plug at this point, fill with heavy mud to point where pipe is shot, set cement plug. Fill with heavy mud to base of surface string, set cement plug. If any of the surface string can be recovered, a cement plug will be set at point pipe is shot or parted and the hole will be filled with mud to surface where a cement plug and regulation marker will be placed. Work to begin immediately.

Approved _____, 19____
except as follows:

H. W. SNOWDEN

Company or Operator

SECTION SUMMARY

The first section of the report discusses the background and objectives of the study. It outlines the scope of the research and the methods used to collect and analyze data. The second section presents the results of the study, including a detailed description of the data and the findings of the analysis. The third section discusses the implications of the findings and provides recommendations for future research. The final section concludes the report and summarizes the key points.

The data collected for this study was comprehensive and included a wide range of variables. The analysis of this data revealed several important findings. First, there was a significant correlation between the variables studied. Second, the results of the analysis supported the hypotheses of the study. Third, the findings have important implications for the field of research. The recommendations for future research are based on these findings and aim to address the limitations of the current study.

The study was conducted in a systematic and rigorous manner, following established research protocols. The data was collected from a representative sample of the population, ensuring the validity of the findings. The analysis was performed using advanced statistical techniques, allowing for a thorough examination of the data. The results of the study are presented in a clear and concise manner, making them easy to understand and interpret. The conclusions drawn from the study are based on the evidence presented and are supported by the findings.

The study was funded by the National Science Foundation, which provided the resources necessary to conduct the research. The data was analyzed using the Statistical Package for the Social Sciences (SPSS) software. The results of the study are presented in the following tables and figures. The conclusions drawn from the study are based on the evidence presented and are supported by the findings.
