Injection is to be through the three authorized water injection wells,
each of which is to be equipped with a string of plastic-lined tubing
set in a packer located between the Grayburg and San Andres zones.
Injection into the San Andres shall be through the tubing while injec-
tion into the Grayburg shall be through the casing-tubing annulus.
Surface casing in all injection wells shall be set at a minimum of 400
feet beneath the surface with cement circulated.
