DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose under Unit Water Flood Agreement, to re-enter this producing well and convert to water injection in the following manner:

Clean out and deepen from 2985' T.D. to approximately 3170'. Run and cement 4" liner, log and perforate pay zone and equip for water injection.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
