17. DESCRIBE PROPOSED OR PLANNED OPERATIONS (Clearly state all pertinent details, including pertinent dates, including estimated date of starting the proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Our last report indicated the well would be reactivated within 90 days from January 1st. However, Texaco has been considerably later on installing the waterflood operation than earlier anticipated, and the well will probably not be reactivated until July or August.
