Dear Sir:

Recently you called us regarding the Windfohr Oil Company Jackson "A" well #3-X, which is one of the proposed water injection wells in their waterflood project. You stated that you did not have any well records in your files except possibly on the Jackson "A" #3 well, which I understand was only drilled a few feet and the rig was skidded to drill the Jackson "A" #3-X well. We have copied the well log in the file of Windfohr Oil Company and are attaching two copies of this form for your files. You will note that originally the well was drilled under the name of Flynn, Welch & Yates.

Please advise if we can be of any further assistance.

Yours very truly,

  
REGISTERED PETROLEUM ENGINEER.
