Completion or Recompletion Report No. 146 (Rev. 1-66) 146-74

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Well is pumping about 30 BO + 326 BWPD, but has declined rapidly over the past year. It is proposed to stimulate production by setting a Lynes packer in open hole at 3410' and treating below with 500 gallons of acid + 5,000 gallons of HAL-4033 gel + 5,000 gallons of MOD-202 acid containing Protex-A11. Treatment will be in 2 stages with a salt-benzoic acid plug between stages.
