13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Water entered the borehole on March 23, 1992. The 7" casing filled up and began to run over. We dug a small pit on location, fenced it and netted it. The well is running over at the rate of 250 BWPD. We request approval to pit the water temporarily before hauling it to the disposal pump. We intend to isolate the entry of the water and perform the necessary repairs to stop the water beginning approximately March 25, 1992.
